

FREE TSST STEM

Subject Knowledge Enhancement Courses for Qualified Teachers

This training is bespoke, designed to meet your existing needs and can be tailored to the training needs of your department. Participation is free and there is a £400 Bursary available for participation.

A range of support and guidance is available to enhance the teaching and learning of STEM subjects. This could include:

- Triple Science support
- Scheme of work development support
- Review of required practicals and how to deliver these effectively
- Innovative teaching techniques using ICT
- Deepening thinking through questioning and ways to encourage this across a department
- 'Break it down' teaching, simplifying concepts from the chemistry specification for a greater understanding
- Science subject knowledge enhancement
- Action planning
- Bespoke support services

To discuss your TSST training needs for your Science department, please contact catts@thepolesworthschool.com
