We are holding a virtual event for interested stakeholders including health and social care professionals to officially launch the Creative Health programme suite.

Warwickshire County Council's Creative Health suite incorporates six commissioned programmes. The objective is to use arts activities to promote social connectivity and improve wellbeing.

The courses are:

- Arts for Wellbeing Warwickshire
- Arts and Nature
- Singing for Lung Health
- Children and Young People Arts on Referral
- Parents and Infants Arts on Referral
- Arts for Dementia

The purpose of the event is to:

- Explain how people can access the programmes including referral routes
- Mini taster arts activities to provide some first-hand experience of the programmes
- Share participant stories
